Absolute

Neutral Detergent

CHEMROSE

Product Data Sheet

Absolute is a concentrated and powerful multi-purpose detergent. It has a fresh citrus scent and can be used in industrial, commercial, and household cleaning of floors and all washable hard surfaces. Absolute is pH-neutral and safe to use on sensitive terrazzo, marble, and tiled floors.

BENEFITS

- ✓ pH-neutral
- ✓ Extremely versatile
- ✓ Biodegradable ingredients
- ✓ Perfect for alkali-sensitive surfaces

ENVIRONMENTAL CARE

Absolute is a next-generation cleaning liquid formulated to provide effective cleaning power with minimal impact on the environment. It is boosted by d-Limonene, a natural solvent extracted from the peels of citrus fruit. Absolute contains biodegradable ingredients, is phosphate-free and pH-neutral.

PROPERTIES

Colour: Transparent red liquid
Odour: Citrus
pH: 7.0 ± 0.2
Foam Level: Medium to high foam height
Shelf Life: Minimum 1 year (5°C - 50°C)

AVAILABLE SIZES

Available in 5L

HOW TO USE

For heavy-duty cleaning, dilute 1 part Absolute in 40 parts with water. For light-duty cleaning, dilute 1 part Absolute in 80 parts with water.

Erect wet floor signs. Apply the Absolute solution with a spray bottle, cloth, sponge, mop, or autoscrubber. Wipe or scrub the wet surface until it is clean. Absorb or wet-vacuum up the spent solution. Rinsing with clean water is only required after scrubbing very heavily soiled surfaces. Allow the floor or surface to dry before returning it to service.

NOTE: This is a guide only. Concentration may be varied according to the degree and persistence of soilage.

WHERE IT WORKS

Absolute is a pH-neutral, multi-purpose cleaner that removes all soil and spillages from all types of floors and other surfaces, including food, drinks, cooking oils, and general traffic dirt. It is recommended for use on alkali-sensitive surfaces such as marble, terrazzo, or ceramic tiles.

HOW IT WORKS

The surfactants in Absolute are known as colloidal particles that work to dissolve soil at a macromolecular level. These particles decrease the solution's surface tension; and attack, encase, and extract soils from the surface allowing it to be washed away with ease. Absolute also contains ingredients to dissolve oily matter and solid particles away from the hard surface being cleaned.

Chemrose maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Chemrose recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

HEALTH

Concentrated Absolute is classified as hazardous according to the criteria of Safe Work Australia. It is irritating to the skin and causes serious eye damage.

Absolute becomes non-hazardous when diluted to 1 in 12 (9%) in water. Please refer to the Safety Data Sheet for more information.

QUALITY

The design, manufacture, and supply of all Chemrose products is controlled by the Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 “Quality Management Systems – Requirements”.

Certification available on request.

DISPOSAL INFORMATION

1. Used solutions

Used solutions of Absolute should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although Absolute has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).
If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water. Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums
Our 5L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. Chemrose Suppliers Pty Ltd recycles containers wherever possible, significantly reducing plastic usage and waste.

Cardboard cartons
Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.

Chemrose maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Chemrose recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
