Sparkle

Water-based Detergent

CHEMROSE

Product Data Sheet

Sparkle is a water-based, general-purpose detergent suitable for all washable hard surfaces. It contains biodegradable surfactants and contains no toxic ingredients, solvents, or allergens. At the correct dilution, it is ideal for sensitive individuals such as in kindergartens or age-care facilities. Sparkle is fast-acting and removes all types of light to medium soil with ease.

BENEFITS

- ✓ Mild detergent with no toxic ingredients
- ✓ Multi-purpose cleaner
- ✓ Hypoallergenic vanilla fragrance
- ✓ Biodegradable raw materials

ENVIRONMENTAL CARE

Sparkle was developed from carefully selected ingredients providing many environmental benefits including:

- ✓ biodegradable surfactants derived from renewable & regrowable resources
- ✓ pH-neutral
- ✓ food-grade dye
- ✓ non-flammable
- ✓ low VOCs
- ✓ hypoallergenic perfume
- x phosphates
- x ammonia
- x glycol ethers
- x nonyl phenol ethoxylates
- x free caustics
- x chlorine
- x heavy-metal sequestering agents

PROPERTIES

Colour: Orange liquid
Odour: Lemon
pH: 7.0 ± 0.5
Foam Level: Medium to high foam height

AVAILABLE SIZES

Available in 5L

HOW TO USE

		HEAVY-DUTY	LIGHT-DUTY
Mopping		1 part Sparkle in 40 parts with water	1 part Sparkle in 80 parts with water
Auto-scrubbing	**Small**	1L Sparkle per tank	500ml Sparkle per tank
	Large	2L Sparkle per tank	1L Sparkle per tank
Window Cleaning		Use 1 part Sparkle in 300 parts with water	
Spray & Wipe		Use 1 part Sparkle in 15 parts with water	
Toilet Cleaning		Dilute to 1 in 2 parts with water and use 100ml per bowl	

NOTE: This is a guide only. Concentration may be varied according to the degree and persistence of soilage.

WHERE IT WORKS

Sparkle removes all light to medium soils and spillages including foodstuffs, drinks, fats, and general traffic dirt from all types of floors, walls, windows, toilets, paintwork, laminates, and other washable surfaces. Sparkle is recommended for use on alkali-sensitive floors such as timber, terrazzo, and marble.

HOW IT WORKS

The surfactants in Sparkle are known as colloidal particles that work to dissolve soil at a macromolecular level. These particles decrease the solution's surface tension; and attack, encase, and extract soils from the surface allowing it to be washed away with ease.

Chemrose maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Chemrose recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Sparkle

Water-based Detergent

CHEMROSE

Product Data Sheet

HEALTH

Sparkle is a hypo-allergenic*, water-based cleaner that contains no allergens, no solvents and no toxic ingredients. Being free from solvents and allergens, Sparkle will not compromise the indoor air-quality of buildings it has been used to clean. Concentrated Sparkle is classified as hazardous according to the criteria of Safe Work Australia. It is irritating to the skin, causes serious eye damage and may be harmful if swallowed.

Sparkle becomes non-hazardous when diluted to 1 in 32 (3.1%. in water. Please refer to the Safety Data Sheet for more information.

*Hypo-allergenic means every possible care has been taken in formulation and production to ensure the lowest possibility of allergic reactions occurring in sensitive individuals.

QUALITY

The design, manufacture, and supply of all Chemrose products is controlled by the Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 “Quality Management Systems – Requirements”.

Certification available on request.

DISPOSAL INFORMATION

1. Used solutions

Used solutions of Sparkle should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although Sparkle has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).
If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water. Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles

Our 5L bottles are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. Sparkle containers will be cleaned and reused if returned to Chemrose Suppliers Pty Ltd., significantly reducing plastic usage and waste.

Cardboard cartons

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.

Chemrose maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Chemrose recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
